Continuation of Disposition of Claims: Claims pending in the application are 1,6-11,14,19-21,23,25-29,31,33,34,36-42,45-49,52-55,57-64,69,70,74-88,90 and 91.

DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1, 6-11, 14, 19-21, 23, 25-29, 31, 33-34, 36-42, 45-49, 52-55, 57-64, 69-70, 74-88 and 90-91 are rejected under 35 U.S.C. 101 because a method and system for updating a value by performing the mathematical functions to determine a value that do not fall within any of the four categories of statutory subject matter of 35 U.S.C. § 101. The claimed invention is not limited to a practical application. Viewed as a whole, the claimed invention merely expresses a method and system for calculating a value and storing it in the database. It does not impart any function to the processing system, i.e., the claimed invention is not practical applied. The other three § 101 classes of machine, compositions of matter and manufactures can be group as product claims, and the product classes have required physical structure or material. The claimed updated value does not itself perform any useful concrete and tangible result, i.e., because it does not show how the value is used by a device, and thus does not fit within the definition of a machine. In addition, the claim is an abstract construct; therefore, the claims that updates a value in the data base by performing the mathematical functions to determine a value, do not fall within the product classes, machine and composition of matter.
3. Claims 1, 6-11, 14, 19-21, 23, 25-28, 37-42, 45-49, 52-55, 57-64, 66 and 90-91 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory "process" under 35 U.S.C. 101 must (1) be tied to particular machine, or (2) transform underlying subject

matter (such as an article or material) to a different state or thing. See page 10 of In Re Bilski 88 USPQ2d 1385. The instant claims are neither positively tied to a particular machine that accomplishes the claimed method steps nor transform underlying subject matter, and therefore do not qualify as a statutory process. A method including steps of receiving, determining and updating are broad enough that the claim could be completely performed mentally, verbally or without a machine nor is any transformation apparent. For example, the determining can be calculating mentally. The applicant should insert "by a processor of the communication device" at the determining step because "at the communication device" is still broad enough to perform mentally.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action based on the amended claims on 9/6/2007. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
